

AHEAD, Tanium, and ServiceNow

Restoring CMDB Reliability & Endpoint Security

The synergy between AHEAD, Tanium, and ServiceNow revolutionizes CMDB reliability and bolsters endpoint security, offering unmatched value. By addressing the prevalent issue of outdated and unreliable CMDB data, these solutions empower businesses to gain comprehensive visibility into their environments. This enhanced awareness eliminates guesswork, ensuring all endpoints are properly managed and secure, which significantly mitigates risks associated with inconsistent patching and non-compliance. Collaboration between these leading technologies not only restores trust in CMDB data, but fortifies the security infrastructure, driving operational excellence.

Client Challenges

30%

Only 30% of IT operations and security teams believe they have visibility into 85-95% of their network endpoints.

20%

On average, 20% of endpoints remain unaccounted for in most organizations, exposing them to unmanaged security risks.

2-5 Months

Businesses can take from 60-150 days to patch a vulnerability, leaving ample time for cybercriminals to find gaps in security.

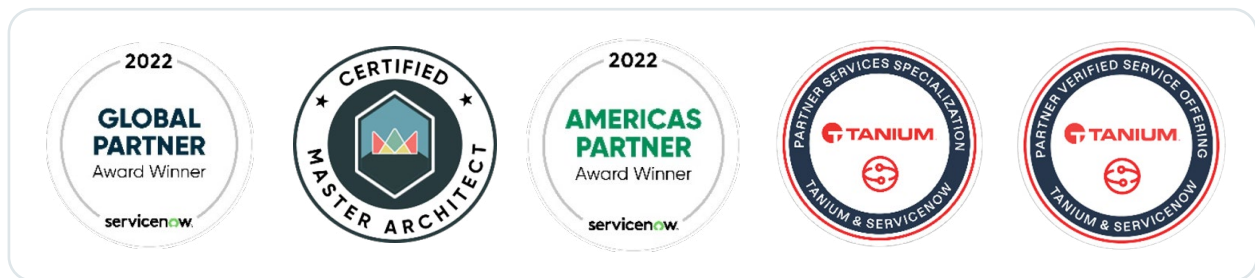

01%

Only 1% of businesses are meeting their mean time to remediate, leading to legal and reputational issues.

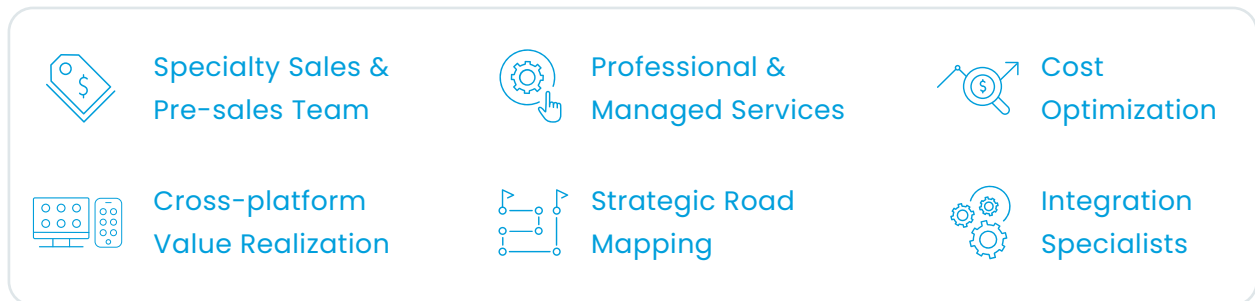

Solution Overview

AHEAD offers a robust solution to address the prevalent challenges in CMDB reliability and endpoint security. By deploying network discovery tools, AHEAD identifies unaccounted servers and creates a trusted ServiceNow CMDB with real-time updates from Tanium. This approach simplifies integrations, reduces system complexity by consolidating tools, and leverages improved endpoint visibility for quicker resolution of CVEs and automated patch management. Furthermore, AHEAD proactively monitors and resolves end-user performance issues, thereby enhancing the overall customer experience.

Why AHEAD

AHEAD is a ServiceNow Elite Partner and Tanium Strategic Partner with proven certified expertise, making us uniquely capable of designing, implementing, and optimizing seamless integrations with dedicated pre- and post-sales support.
