

The AHEAD logo is positioned in the top left corner of the image. It features the word "AHEAD" in a white, sans-serif font, with a blue horizontal bar integrated into the letter "E".

AHEAD

AHEAD Rapid Assess

Accelerate Cloud Migration with Confidence & Clarity

Cloud migration is complex — but it doesn't have to be slow, risky, or overwhelming. AHEAD Rapid Assess fast-tracks your cloud migration planning through a highly structured, data-driven approach that delivers real business outcomes.

We combine detailed, automated technical assessments, financial modeling, and security-first strategies into a single, actionable roadmap — giving you everything needed to confidently move forward.

How Rapid Assess Works

Discovery & Data Collection

We begin by mapping your applications, infrastructure, dependencies, and business priorities. Using automated tooling—further informed by workshops and stakeholder interviews—we quickly build a complete current-state view.

Analysis & Modeling

Our architects assess your environment for cloud suitability, migration complexity, modernization opportunities, and security gaps. In parallel, our financial team develops a TCO model comparing your current costs to cloud-native options across AWS, Azure, and Google Cloud.

Roadmap Development

Based on technical readiness, business value, and operational risk, we group applications into migration waves, define target landing zones, and recommend security enhancements — culminating in a full migration and modernization roadmap.

What You'll Receive

At the conclusion of your Rapid Assess engagement, you'll receive a comprehensive, customized set of deliverables, including:

- **Application Cloud Readiness Assessment:** Scoring your portfolio for migration complexity, cloud fit, and business criticality.
- **Financial Business Case:** TCO and ROI modeling, including projected savings and funding eligibility through AWS MAP, Azure AMP, or Google RaMP programs.
- **Cloud Architecture Blueprint:** Diagrams and high-level designs for secure, scalable cloud environments.
- **Migration & Modernization Roadmap:** Sequenced waves of workloads, prioritized for business impact and ease of execution.

Every deliverable is designed to support immediate action — enabling faster executive decision-making and accelerated transformation initiatives.

Why AHEAD?

- **Speed to Value:** Actionable results in 4–6 weeks — not months.
- **Security-First:** Every plan integrates security and compliance from the start.
- **Financial Clarity:** Transparent cost models and maximized funding opportunities.
- **Deep Expertise:** 2,000+ workloads assessed and migrated across industries.
- **Modernization Ready:** Focus on not just migrating but optimizing for the future.

Unlike large consulting engagements that often delay action, AHEAD delivers a focused, practical, and immediately executable plan — tailored to your unique needs.

Engagement Timeline

<i>Phase</i>	<i>Duration</i>	<i>Focus Areas</i>
Pre-Kickoff	1 week	Planning, stakeholder alignment
Discovery	2–3 weeks	Data collection, interviews, workshops
Analysis	1–2 weeks	Technical evaluation, financial modeling
Recommendations	1 week	Roadmap, executive presentations

Total Time to Completion: 4–6 weeks

Business Outcomes

30–40%

reduction in operational overhead

Strengthened security posture aligned to regulatory standards

25–50%

faster cloud migrations compared to traditional models

Clear executive alignment around strategy and investment priorities

Optimized TCO through automation, right-sizing, and long-term planning

Take the First Step

Your cloud future doesn't start with guesswork. It starts with Rapid Assess.
Contact AHEAD today to schedule a discovery workshop and learn how we can accelerate your migration — securely, cost-effectively, and strategically.
